# ImagePlus+
Enhanced Digital Imaging

ImagePlus+ delivers high quality digital images providing an easy to use platform that allows flexibility in image processing of specific exams and preferences of the user. In addition to superior results when packaging ImagePlus+ with a new TXR system, its' performance exceeds expectations for field upgrades.

Patient Registration

PATIENT REGISTRATION MADE SIMPLE

- Intuitive patient registration and emergency patient bypass
- List multiple studies for patient
- Search patient by patient name, patient ID, accession number, date or barcode

VIRTUAL CONTROL CONSOLE REDUCES SETUP TIME

- Select relevant exam/study/procedure at acquisition monitor
- View preprogrammed APR techniques and fine tune at acquisition monitor
- Optional AEC is selected at acquisition monitor

Virtual Control Console

HIGH QUALITY IMAGES – SYMPHONY IMAGE PROCESSING

- Improved image contrast, adjusts dynamic range, enhances detail and reduces noise
- Exam specific algorithm image processing
- Automatic image optimization
- Default or customized algorithm settings can be configured

DOSE REDUCTION

- Advanced noise reduction technology
- Optimized image calibration technology

High Quality Images/Does Reduction

IMAGE MANAGEMENT

- DICOM worklist from HIS/RIS
- Image transfer to PACS
- Print Image, film size and layout can be defined
- Burn CD
